

# **GAPS Train the Trainers: Simulation-Based Teaching for Team Building and Resilience.**

## **a 2-day course for clinical teachers**

at **GAPS**

**St George's Simulation and Skills Centre, London**

### **Our course matches CPD matrix topics:**

- Personal education and learning
- Quality improvement
- Team leadership and resource management
- Faculty development
- Work place assessment
- Education supervisor training

**£500**

**£450 for early bookers**

### **Our course**

Designed for individual clinicians, clinical teams and health service leaders wanting to use simulation in their clinical teaching, the course is comprehensive and practical and involves an inter-professional mix of those involved in clinical training.

Participants include undergraduate and postgraduate teachers in acute hospitals, other health service institutions and primary care from medical, nursing, midwifery and professions allied to medicine backgrounds.

**The course emphasises 'hands on' simulator activities**

### **Topics Covered**

- Research in high risk organisations
- Resilience Engineering
- Educational theory and feedback
- Mobile and fixed patient simulator techniques
- Team assessment and behavioural observation tools
- Inter-professional conversations about practice

### **Learning Outcomes**

Participants should be able to:

- Apply a variety of small group teaching strategies and techniques with simulation to enhance their team learning environment.
- Draw from an extended repertoire of feedback techniques.
- Be advocates for multi-professional team training using simulation and be able to refer to its evidence base for patient safety.
